Vaccination for COVID-19

In an effort to prevent the spread of the COVID-19 infection, we will be providing the COVID-19 vaccine to the parents and children between the ages of 12 – 18 years old.

Applications for the COVID-19 vaccination is solely on a voluntary basis. There is the possibility that one may experience side effects such as soreness in the immediate area of inoculation, headache, chills, and fever. In rare instances, adverse health effects* can also be experienced.

It is important that one considers and understands the risks associated before the electing to receive the COVID-19 vaccination.

*In the event that one experiences severe side effects resulting from the vaccination, support will be provided in accordance with immunization regulations.

Please contact the Vaccination Call Center below, concerning allergic reactions or side effects.
